

CLEAN ENERGY Flotilla:

A Canoe and Kayak Trip In The Delaware Water Gap

Join our Flotilla on the Wild and Scenic Delaware River And learn about these issues!

1. The GenOn Portland coal-fired power generating plant emits 30,000 tons of sulfur dioxide each year contributing significantly to air and water pollution and asthma and other health effects in PA and NJ. IT NEEDS TO BE SHUT DOWN!

2. The Appalachian Trail and the Delaware Water Gap are in trouble. PSE&G has applied to the National Park to replace the existing 80' tall power lines with 195' monster towers.

These towers will bring electricity generated by more coal-fired plants and ruin the views and natural resources of this Wild and Scenic area. WE NEED TO TELL THE NPS "NO" TO ANY OF THE PROPOSED POWERLINES ROUTES!

3. Marcellus Shale drilling threatens our river and drinking water supplies. WE NEED TO STOP THE DRILLING EVERYWHERE!

YOUR HELP is needed on each of these issues. Come paddle, learn and **get involved!**

**June 4, 2011, Saturday
10am
Rain date – June 18th**

Join us on a 10-mile river trip from Smithfield Beach to the Portland-Columbia Pedestrian Bridge. Bring lunch, snacks and water for the day.

- Participants with their own boats meet 10:00 am at the Smithfield Beach access.
- For rentals – contact Chamberlain Canoes at www.chamberlaincanoes.com or 1-800-422-6631 to make arrangements for your boat rental with a drop-off time of 10a.m. at Smithfield Beach.
- Our lunch break will be at Kittatinny Point where we'll talk about the health impacts of burning coal and what we can do to protect our families and the environment

To RSVP please contact Leona: Leona@pineypaddlers.com or 609-259-3734
